

Hemp CBD Extract: The Inshanti Difference

What Is the World Discovering about Hemp CBD Extract?

The world is beginning to awaken to the benefits of hemp CBD extract. The extract has been the subject of intense study for decades. You can find links to scientific articles about CBD's effect on various health conditions at <https://www.projectcbd.org/guidance/conditions>. Here are the benefits according to a few studies:

- Cannabidiol (CBD) was found to lower anxiety according to a study published in the *Journal of Psychopharmacology* (http://jop.sagepub.com/content/7/1_suppl/82.short).
- Inflammatory and neuropathic pain was suppressed by using CBD as shown in a study published by *The Journal of Experimental Medicine* (<http://jem.rupress.org/content/209/6/1121.long>).
- A review of studies concerning CBD and inflammatory bowel diseases (IBD) found it to be "very promising compound" to be further investigated for use in relapsing forms of colitis (<https://www.ncbi.nlm.nih.gov/pubmed/22815234>).

Even the registered U.S. Patent #6,603,507, which is owned by the U.S. Department of Health and Human Services, mentions CBD's usefulness as an antioxidant and neuroprotectant. The FDA, however, has not evaluated these products, and they require us to say the following: "These products are not intended to diagnose, treat, or cure any disease."

Reap the benefits of Inshanti's high-CBD, low-THC, certified organic hemp CBD extract. Extracted from hemp with CO₂, the THC level in our CBD hemp products is kept below the federally legal limit of 0.3%, meaning it is not a mind-altering drug. It is non-addictive, non-intoxicating and perfectly legal in all 50 states. We offer it at Inshanti for people who have read about the possible therapeutic benefits of CBD and wish to see if it alleviates their own symptoms.

Why Is Inshanti's Hemp CBD Extract the Best Choice?

Our CBD extract comes from hemp grown organically as part of a government-approved industrial hemp research project in Kentucky and is pesticide-free and mold-free. You can find cheaper hemp products imported from Europe, but they are usually made from waste hemp (byproducts) that contain heavy metals and need to be refined using harsh chemical solvents. Not so with Inshanti CBD products. Ours are produced in the U.S. using the entire organic hemp plant and needing no chemical refinement.

Our CBD products are your best and safest choice. You may find hemp CBD products at a cheaper price, but it's best to be a wise consumer and analyze what you're getting:

Inshanti.com

Inshanti Hemp CBD Extract	Many other hemp products
Grown and produced in Kentucky, USA	European hemp of unknown origin, often hemp byproduct
Organically grown; no pesticides, herbicides, or fungicides	Unknown origin, so may contain pesticides, herbicides, and fungicides
Produced only from full hemp plants grown in Kentucky	Crafted from cheap or free “trash” hemp left over from industrial applications
Natural extract with all the cannabinoids and phytochemicals contained in the plant	Purified CBD crystals produced from waste hemp and then dissolved in a carrier oil
Initial extract is 48–58% CBD	Initial extract is 10–14% CBD
Free of heavy metals	As waste hemp often contaminated with heavy metals
Extracted with CO ₂ , with no solvents; product is pure, organic	Requires chemical solvents be used to refine and remove heavy metals
Certified hemp by international standards, ensuring extremely low THC levels	Hemp of unknown origin
GC/MS analysis of every batch to ensure quality and safety	May or may not be tested

Because of its perfect growing conditions, Kentucky was once the leading hemp producer in the United States. In 1970, the Controlled Substances Act made it illegal to grow hemp without a permit because the hemp plant comes from the same family as marijuana. However, hemp has very low levels of THC and high levels of CBD, making hemp products not psychoactive. In 2014, Kentucky was authorized through the farm bill to begin growing and producing hemp products again. Now you can reap the rewards.

Don't be fooled by cheap imitations or fancy marketing. Get the purest product carefully crafted right here in the United States. Our popular hemp CBD extract drops are now available in three varieties—cinnamon, vanilla mint or unflavored.
